

# Ascot Home Medical Monitoring System

**FINALLY, a device that quickly and securely transmits** physiological readings from your patient's home to your office.

The Ascot Home Medical Monitoring System (HMMS) reduces risks to your patient's health because it speeds up communication. The HMMS is rigorous enough to be used in clinical settings but is so easy to use. It's ideal for home use.

The Ascot HMMS improves accuracy because readings are transmitted directly from your patient's home to you.

## BENEFITS

- One system to review readings of blood pressure and glucose
- Real-time reporting your blood pressure and blood glucose readings
- Peace of mind

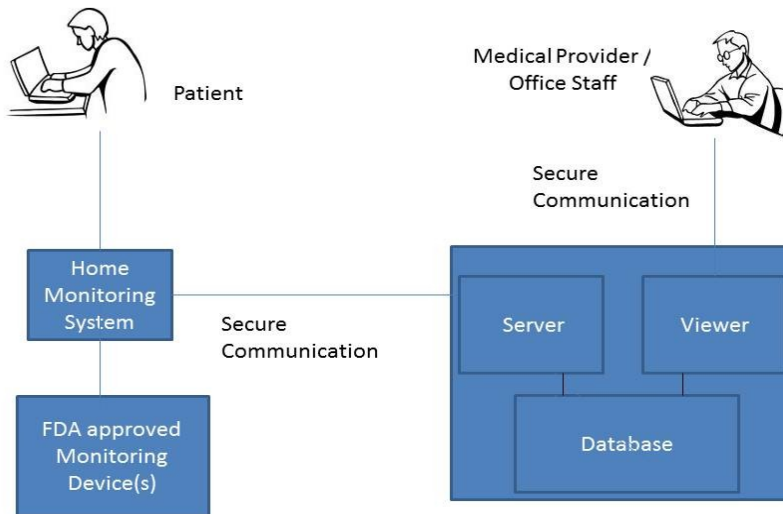

Ascot Technologies, dedicated to providing specialized software solutions to meet understands business, technology and speed to market your Internet and wireless needs.

Let Ascot Technologies help you transform your knowledge into usable and marketable technology solutions. Our deep understanding of technology provides real-time wireless access to your data to give you an advantage in the marketplace.

## ASCOT HOME MEDICAL MONITORING SYSTEM

Facilitates on-going management of hypertension or diabetes from home, which may require patient monitoring under direction of physician or other qualified medical professional.

- ◆ Automates the process for reporting patient readings to physician
- ◆ Automates communication of medication dosage changes to patient
- ◆ Provides communication using secure wired or wireless connections, including cellular
- ◆ Provides convenient web interface for physician to view readings and send medication changes back to patient
